

Lesson Plans - What Sound Will The Sky Make Today

To be used with the album:

“Come and See My Rainbow - Kindergarten Music Volume 1” by Barb McIlquham

Before Teaching the Song:

1. Talk about what sounds come from the sky.
2. Have students make their own sounds for wind, thunder, rain and birds.
3. Have the students do their own actions for wind, thunder, rain, and birds.

After Teaching the Song:

1. Divide the class into four groups. Have each group paint their own mural for the verses in the song. Have the words to each verse printed underneath. These murals can be displayed in the class to tell a story.
2. This song does not need to be sung in its entirety. Depending on the weather, any particular verse can be sung as part of a daily weather lesson.
